Bronstein says virtual fashion is "huge" within the Roblox community. "People can also be whoever they want to be on the platform, and this authenticity is an important part of their self-expression, be it in real life or in the Metaverse." He points to the recent Gucci Garden event, which saw a virtual bag eventually sell for around \$4,115. Its physical counterpart costs \$3,400. The bag cannot be transferred out of Roblox, suggesting that some users place primacy on how their avatars look over being able to flaunt these items in the physical world. In 2006, Baszucki and Cassel launched Roblox Studio. It was, in Bronstein’s own phrasing, an “immersive creation engine”, blending gaming, creation, and social networking. Roblox might have the veneer of a video game, but it’s perhaps more accurate to describe it as a set of tools its users can wield to build their own video games (or “experiences” as the company sometimes refer to them), to be hosted on the Roblox platform. These creation tools are designed to be less daunting to the entry-level developer than professional game engines, and fully customisable frameworks exist across numerous genres. These include maze-runners, first-person shooters, tycoon simulators, and free-form “roleplay” genre, where developers create worlds – schools, cities, historical eras, sci-fi dystopias, etc – for users to project their own stories onto, informed by their interactions with the setting and other users.

But Fortnite and Minecraft largely offer fixed experiences around set mechanics. Roblox, on the other hand, lets developers make whatever type of games they want — whether that be a third-person action game, a first-person shooter, or that time Lil Nas X threw a concert — and players can grab their friends and hop from game to game and world to world with almost no friction at all.

All of them might style themselves as Metaverses, but they are not – yet – interoperable with one another. This is an aspect that Bartle feels is antithetical to his definition of the thing. “You can't have a Metaverse, you have to have the Metaverse,” Bartle says.
